Profile

I am a Research Scientist at RIKEN Center for Advanced Intelligence Project (AIP), Japan. Previously, I received my Ph.D. degree in Information Science and Technology from The University of Tokyo in 2020.

My research centers on natural language processing, with a particular focus on knowledge acquisition from real-world data. Specifically, I develop methods for information extraction, knowledge base organization, information retrieval, and question answering, often targeting specialized domains such as biomedical science. Recently, my work has focused on expanding and refining the knowledge capabilities of large language models.
